PRESENTATION

I am a goal-oriented and creative full stack developer with a background in technology and design. With several years of experience at international companies like Apple, as well as running my own business, I have developed a strong ability to take responsibility, work in a structured way, and deliver results in fast-paced team environments. What drives me is combining technology and design to create digital solutions that are accessible, user-friendly, and meaningful. I thrive in roles where problem-solving, innovation, and collaboration are in focus. My curiosity, sense of the bigger picture, and passion for people and learning permeate both my professional life and personal projects, including volunteering in coding activities for children. I look forward to contributing with my range of experience, drive, and ability to turn ideas into concrete digital results.

PROFESSIONAL EXPERIENCE

Fullstack Developer Javascript: Internship Nejla AB / Gothenburg -remote

Aug- Nov-2024 // Jan- Jun 2025.

Participated in modernizing a reporting system for municipalities by migrating to Nuxt.js 3 with Vue 3, TypeScript, and BootstrapVue Next. Developed reusable components for handling complex data variables and contributed to accessibility improvements according to EAA requirements. The degree project focused on accessibility enhancements and Cypress testing. Worked in an agile team using Kanban in GitLab.

Frontend developer: Internship GetCrypto Game / Barcelona-Spain -remote

Dec- Jun-2022/23.

Contributed to the frontend development of the digital version of "Get Crypto Game." Focused on improving UI and creating a reusable design system in SASS. Worked with Next.js, Vue.js, and Styled Components.

Fullstack Developer: Internship GET IT NORDIC AB / Gothenburg

Aug- Oct-2022.

Developed a marketing site for the GitHub app launch: gethub.se. Worked in collaboration with a UX developer, marketing manager, content manager, and development team. The site content was managed via Contentful and implemented with Next.js and GraphQL.
